

MASPORT M-TECH[®] POWER MANAGEMENT RE-POWER SYSTEM

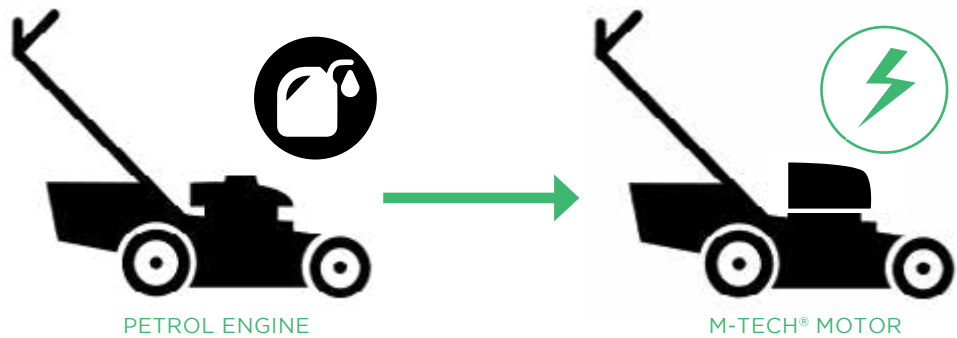

M-TECH[®] POWER MANAGEMENT

Masport has made durable and high performance lawnmowers for over 80 years and knows how to make a lawnmower that can be trusted and relied on to last.

Masport M-TECH[®] is a new power management system that provides the latest lithium-ion battery technology to power a brushless induction electric motor that will match the performance of many domestic petrol engines.

With the M-TECH[®] Power Management Re-power System you are able to upgrade an existing petrol-powered lawnmower to the latest battery technology. Installing a Re-power System helps to extend the longevity of a lawnmower.

- Upgrade to Lithium-ion battery power
- New technology made more affordable

UPGRADE TO LITHIUM-ION BATTERY POWER

THE RE-POWER SYSTEM INCLUDES THE FOLLOWING:

1.

- Masport upper handle bail

2.

- M-TECH® 58v 4.3Ah lithium-ion battery
- Motor pod with operating control system
- 7/8" stainless steel blade driver
- 18" disc assembly with M-TECH® swing back blades
- Centralising centre bolt with retaining collar
- Motor mounting bolts

3.

- Switching system with 5 stage LED status indicator
- 58v 3amp fan assisted battery charger and cables

Suitable for re-powering Masport, Morrison and other suitable 18" lawnmower brands. Ensure installation is done as per manufacturer's instruction and by an experienced outdoor power equipment technician.
